Table 4

Population Growth Rate (%), Portugal, 2008-2013

Growth rates (%)	2008	2009	2010	2011	2012	2013
Total population growth rate	0.09	0.10	-0.01	-0.29	-0.52	-0.57
Natural growth rate	0.00	-0.05	-0.04	-0.06	-0.17	-0.23
Migration growth rate	0.09	0.15	0.04	-0.23	-0.36	-0.35

Notes:

- (1) Population Growth rate: the ratio of the total population change during the year to the average population of that year.
- (2) Natural Growth rate: the ratio of the natural increase during the year to the average population of that year.
Natural increase: the difference between the number of live births and the number of deaths during a given period, usually a calendar year.
- (3) Migration Growth rate: the ratio of the net migration during the year to the average population of that year.
Net migration: the difference between immigration into and emigration from the country during a given period, usually a calendar year.

Table 13

Life expectancy at birth by sex, Portugal

	M	F	
2008 - 2010	79.29	76.17	82.19
2009 - 2011	79.55	76.47	82.43
2010 - 2012	79.78	76.67	82.59
2011 - 2013	80.00	76.91	82.79

Source: Statistics Portugal, Complete life tables.

Note:

Life expectancy at birth (e0):The mean number of years that a newborn child can expect to live if subjected throughout his life to the current mortality conditions (age specific probabilities of dying).

Life expectancy is calculated using complete life tables with reference period of three consecutive years, coming into force in 2007.

Table 14

Life expectancy (2007 methodology - Years) by Sex, Portugal, 2008-2010; 2009-2011; 2010-2012 and 2011-2013

Life expectancy - Portugal 2008-2010			Life expectancy - Portugal 2009-2011			Life expectancy - Portugal 2010-2012			Life expectancy - Portugal 2011-2013

Note:

Life expectancy at birth (e0): The mean number of years that a newborn child can expect to live if subjected throughout his life to the current mortality conditions (age specific probabilities of dying).

Life expectancy is calculated using complete life tables with reference period of three consecutive years, coming into force in 2007.

Source: INE, I.P., Statistics Portugal, Complete Life Tables.

Table 15**Infant mortality rate by sex**

	MF	M	F
	‰		
2008	3.25	3.41	3.08
2009	3.64	4.13	3.13
2010	2.53	2.50	2.53
2011	3.12	3.52	2.67
2012	3.37	3.38	3.37
2013	2.95	3.43	2.42

Note:

INFANT MORTALITY RATE: The ratio of the number of deaths of children under one year of age during a specific period, usually a calendar year, to the number of live births in that period (usually expressed as the number of deaths of children under one year of age per 1000)

Source: Statistics Portugal, Demographic indicators

Table 16

Infant mortality rate by cause - Portugal

Reference period	Main causes of infant deaths					Other infant causes of death
	Certain conditions related to pregnancy period and the foetal growth	Respiratory distress of the newborn	Congenital malformations of the heart	Other congenital malformations		
2008	0.23	0.12	0.33	0.22		2.34
2009	0.23	0.29		2.69
2010	0.18	0.12		1.89
2011	0.2	0.34	0.33	0.27		1.98
2012	0.18	0.14	0.28	0.27		2.5

... not available.

Infant mortality rate by cause of death = ratio between the number of infant deaths (less than 1 year) for a particular cause of death and the number of live births x 1000.

"Note: Main causes of infant death, do not exhibit the following causes due to the lack of expression of the corresponding rates:

- Other respiratory affections of newborn
- Bacterial septicaemia of newborn
- Hemorrhagic and haematological distress of foetus or newborn
- Rest of certain conditions originating in the perinatal period
- Other symptoms, signs and abnormal findings of laboratory and clinic exams not classified in other part "

Notes: (Po) provisional data. Survey year: The data presented refers to household monetary net annual income in the previous year. The net income was transformed into the equivalent household income per individual, using the OECD-modified equivalence scale. For each household, the equivalent household income per individual is obtained from the quotient of household's total income and the household's size in terms of equivalent adult members, and this value is assigned to each household member.

At-risk-of-poverty rate after social transfers is defined as the share of persons with an equivalised disposable income below the at-risk-of-poverty threshold, which is set at 60% of the national median equivalised disposable income (after social transfers).

At-risk-of-poverty threshold: is defined as 60% median national equivalised income.

2013 (Po)	34.2%

Notes: The data presented refers to household monetary net annual income in the previous year. The net income was transformed into the equivalent household income per individual, using the OECD-modified equivalence scale. For each household, the equivalent household income per individual is obtained from the quotient of household's total income and the household's size in terms of equivalent adult members, and this value is assigned to each household member.

Gini coefficient: is a measure of statistical dispersion most prominently used as a measure of inequality of income distribution or inequality of wealth distribution. It is defined as a ratio with values between 0 and 1: A low Gini coefficient indicates more equal income or wealth distribution, while a high Gini coefficient indicates more unequal distribution. 0 corresponds to perfect equality (everyone having exactly the same income) and 1 corresponds to perfect inequality (where one person has all the income, while everyone else

NA -- Data not available.

Data refers to criminal proceedings at the trial stage finalised in first Instance courts, and to Defendants and sentenced persons within such proceedings.

Data corresponds to:

• Number of persons brought to court: number of Defendants in criminal proceedings at the trial stage finalised in first Instance courts.

• Number of persons arrested: number of Defendants in criminal proceedings at the trial stage finalised in first Instance courts who, at the date of trial, were under pre-trial detention or deprived of liberty.

• Number of persons sentenced: number of persons convicted in criminal proceedings at the trial stage finalised in first Instance courts.

• Number of persons incarcerated: number of persons sentenced to a non-substituted and non-suspended imprisonment penalty within criminal proceedings at the trial stage finalised in first Instance courts.

For each category, the following types of crime were considered:

- Simple and aggravated murder;
- Serious, aggravated and qualified body injury;
- Abduction, kidnapping and hostage-taking;
- Simple and aggravated rape;
- Simple and aggravated rape with abuse of authority;
- Sexual coercion, abuse and fraud;
- Simple and aggravated sexual coercion with abuse of authority;
- Trafficking in persons and exploitation of the prostitution of others;
- Trafficking in children and exploitation of the prostitution of children;
- Sexual abuse of children and dependent minors;
- Sexual and homosexual acts with teenagers;
- Other crimes against sexual freedom and self-determination;
- Robbery or violence following theft;
